AYURVEDA

PITTA

KAPHA

VATA

Born in India over five thousand years ago, Ayurveda is a time-honoured health system – also known as the “Science of Life” – that has preserved its profound wisdom to this day. By harmonising body, mind, and spirit, Ayurveda’s holistic approach honours the individual as a whole, paving a restorative path toward lasting well-being and vitality.

"The body of one who uses oil massage regularly does not become affected much even if subjected to injury or strenuous work. By using oil massage daily, a person is endowed with pleasant touch, trimmed body parts and becomes strong, charming and least affected by old age."

The image shows a tranquil indoor space designed for wellness. In the foreground, a circular area with a light-colored stone floor is adorned with several potted plants, including ferns and leafy greens, arranged around a small, low-profile wooden bench. The background features a large, open space with a high ceiling and a series of tall, cylindrical columns. The columns have a warm, reddish-brown upper section and a lower section wrapped in a light-colored, textured material. The ceiling is composed of a grid of square panels, some of which are illuminated from within, creating a soft, ambient glow. The overall atmosphere is peaceful and inviting, with a focus on natural elements and clean, modern design.

WELLNESS AREA

*“Water purifies, steam sets free,
heat renews, and stillness harmonises.”*

In this quiet sanctuary, time stands still. As the enveloping warmth of the saunas purifies the skin and dissolves deep-seated tension, alternating heat and cold exposure invigorates the body and restores vitality. Here, reclaiming time for oneself becomes effortless.

Mediterranean Sauna

Offering a soft, enveloping warmth with temperatures reaching 50°C and a 55% to 65% humidity level, the Mediterranean sauna promotes natural detoxification, muscle relaxation, and skin regeneration, preparing the body for the more intensive purification of the Finnish Sauna.

Laconium

Boasting moderate temperatures sitting around 55°C to 65°C and low humidity levels, the Laconium promotes the elimination of toxins through intensive perspiration. The result is a relaxed body and a strengthened immune system.

Caldarium

Delivering 90% humidity at a temperature of 45°C, the Caldarium offers numerous body and mind benefits. Harnessing the health-giving, detoxifying power of steam, it helps improve circulation, purify the skin, release muscle tension, and ease joint stiffness. By improving respiratory health and relaxing the body, it is also ideal for managing stress-related conditions.

Finnish Sauna

In the Finnish sauna, or 'dry sauna', high temperatures (80–95°C) are balanced by very low humidity (10–20%). This intense heat induces profuse perspiration, facilitating deep detoxification and the natural purification of the body.

Ice Fountain

Fine ice flakes are applied to the skin to stimulate micro-circulation and constrict the pores. This sharp transition from heat to cold generates positive impulses throughout the body, enhancing circulatory and respiratory functions.

Kneipp Water Paradise

Inspired by the Kneipp holistic therapy, our multi-sensory shower walk harnesses the healing power of alternating cold and warm water, combined with aromatherapy and chromotherapy for an all-round wellness experience. Inducing a sense of well-being and deep serenity, these four invigorating showers offer numerous health benefits, including improved blood circulation, toned tissues, and enhanced fluid drainage.

Experience Showers

A multi-sensory journey combining invigorating water jets with chromotherapy and curated fragrances to stimulate both the senses and circulation. Each spray pattern is designed to promote muscle relaxation and improve skin tone, leaving the body feeling revitalised.

Gym

Equipped with state-of-the-art Technogym technology, our gym allows for independent training tailored to individual routines. For those seeking specialised guidance, expert personal trainers are available to curate bespoke programmes for muscle toning, postural re-education, and body sculpting.

Spa information

To ensure an exceptional experience for every guest, the following guidelines are observed within the Thermae & Spa area.

Bookings and arrival times

To secure a preferred time and date, advanced booking is highly recommended, particularly for weekends and holidays. The Spa team is available to help guests select the treatments or programmes best suited to their individual needs.

Guests are encouraged to arrive 5–10 minutes prior to their scheduled appointment. In the event of a delay, the duration of the ritual or entry to the Wellness Area may be reduced to respect following appointments, and no refund will be given for the time deducted.

What to wear

For hotel guests, a dedicated wellness kit is provided directly in the room. Day Spa guests will receive their kit upon arrival, along with an introduction to the facilities. To ensure safety and comfort, the removal of jewellery, watches, or metal accessories is highly recommended prior to entering saunas and the wellness area.

Spa etiquette

To maintain a certain level of quietness and promote relaxation, guests are requested to silence mobile phones and electronic devices and keep noise to a minimum throughout the facilities.

Gift vouchers

The Spa experience is a pleasure meant to be shared. Elegant vouchers are available for purchase, offering an ideal gift for birthdays, corporate milestones, weddings, anniversaries, or special occasions. Vouchers can be delivered in person or sent directly to the recipient.
